Axxess Prepares Home Health for Value-Based Purchasing with New White Paper

Free resource educates industry on new Medicare reimbursement system

DALLAS (June 28, 2016) – [Axxess](#), an industry leader in home health management software, has released a new white paper to give home healthcare agencies nationwide the tools they need to improve their patient care and grow their business during the industry's transition to a value-based payment system.

The new Axxess white paper, "Home Health Value-Based Purchasing: Thriving in the New Environment," details the measures and processes that the [Centers for Medicare and Medicaid Services, CMS](#), uses to determine how much agencies get reimbursed for their services by Medicare. In this new structure, agencies are compensated not for the amount of services that they provide, but for the quality and results of care.

"[Value-based purchasing](#) is disrupting how organizations have to think about patient care," says John Olajide, President and CEO of Axxess. "It is a complex model, and Axxess is determined to give healthcare providers all the resources they need to succeed and always put quality patient care first in this new Medicare reimbursement system."

This white paper is available [for download here](#).

About Axxess

Dallas-based Axxess is a leading healthcare software company that provides cloud-based software to the home health care industry. The comprehensive and user-friendly software solutions at Axxess empower home health agencies and improve their efficiency by integrating all aspects of their operations, so they can focus their

attention on what matters most: patient care. The innovative software solutions at Axxess put all care and administrative aspects of a home health care agency at the fingertips of providers and managers. Axxess has quickly become the industry's fastest growing home health software company. Axxess is the only home health software provider accredited by the American Nurses Credentialing Center (ANCC).
