INNOVATION LEADER AXXESS INTRODUCES FIRST-EVER
OASIS APP FEATURE FOR ALL MOBILE DEVICES

*Easy-To-Use Interface Enables Seamless Documentation
for Home Healthcare Providers*

DALLAS, March 9, 2017 – Solidifying its standing as the industry leader in home health technology innovation, Axxess has introduced the first-ever OASIS documentation capability on any phone or tablet.

The easy-to-use AgencyCore app, for iOS and Android mobile devices, empowers clinicians in the field with the ability to securely document comprehensive patient assessments while providing care. It is seamlessly integrated with Axxess' cloud-based software, used by more than 2,000 Medicare-certified home health agencies. The app allows users to document care offline and automatically syncs when an internet connection is reestablished.

"This state-of-the-art app enables clinicians to work from any device, anywhere, at any time," said Shradha Aiyer, director of mobile technology at Axxess. "It has a user-friendly interface that enables clinicians to complete documentation, while simultaneously interacting with patients and communicating with other members of their multi-disciplinary care team. Axxess is committed to empowering home healthcare professionals with innovative technology to improve patient outcomes."

OASIS (Outcome and Assessment Information Set), the instrument used to collect and report performance data by home health agencies, is a time-sensitive intake tool required by CMS (Center for Medicare and Medicaid Services). Accurate completion and timely filing are critical to ensure compliance with Medicare standards for faster reimbursements.

Axxess' HIPAA-compliant, responsive mobile app helps users to accurately document home health visits at the point of care and integrates electronic visit verification to automatically verify visit times. It also includes robust features currently available in Axxess' cloud-based software, such as patient charts, care plans and communication notes, allowing users to successfully work from all devices.

The Axxess AgencyCore app is available to Axxess clients through the Apple App Store and Google Play.
