§ 170.315(a)(14) Implantable Devices	Axxess Palliative enables a user to record Unique Device Identifiers associated with a patient's Implantable Devices.	
§ 170.315(b)(1) Transition of Care	Axxess Palliative enables a user to create a transition of care/referral summary formatted in accordance using the Continuity of Care Document, Referral Note, Discharge Summary document templates	All costs are included within software licenses fees according to contract terms and conditions
§ 170.315(b)(10) Electronic Health Information Export	Axxess Palliative enables a user to timely create an export file(s) with all of a single patient's or population of patient's electronic health information that can be stored.	
§ 170.315(b)(11) Decision Support Interventions	Axxess Palliative enables a limited set of identified users to select (i.e., activate) electronic decision support interventions.	
§ 170.315(d)(1) Authentication, Access Control, Authorization	Axxess Palliative enables unique user identification and authentication against unique identifiers (e.g., username/password) before providing access to electronic health information and includes the ability to control the specific access and privilege rights a user is granted.	
§ 170.315(d)(2) Auditable Events and Tamper-Resistance	Axxess Palliative supports auditable events for security auditing of access to electronic health information according to standard.	
§ 170.315(d)(3) Audit Report(s)	Authorized users can create an audit report for a specific time period and can sort the entries in the audit log.	
§ 170.315(d)(4) Amendments	Authorized users can document patient requests for amendments when the amendment is accepted and when denied.	

Capability	Description of Capability	Costs or Fees *Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability OR- in connection with the data generated in the course using the capability*
§ 170.315(d)(5) Automatic Access Time-out	Axxess Palliative automatically stops a user's access after a period of inactivity and requires re-entry of credentials according to regulatory guidance.	
§ 170.315(d)(6) Emergency Access	Axxess Palliative has an emergency plan that can enable emergency access per emergency preparedness guidelines.	
§ 170.315(d)(7) End-user Device Encryption	All data is stored in an encrypted format when application is not in use. Axxess Palliative encrypts data in alignment with regulatory standards.	
§ 170.315 (d)(8) Integrity	Axxess Palliative leverages a hashing algorithm in alignment with regulatory requirements.	
§170.315(d)(9) Trusted Connection	Axxess Palliative encrypts stored authentication credentials.	
§170.315(d)(12) Encrypt authentication credentials	Axxess Palliative encrypts stored authentication credentials in accordance with standards adopted in § 170.210(a)(2).	
§170.315(d)(13) Multi-Factor authentication	Axxess Palliative supports the authentication, through multiple elements, of the user's identity with the use of industry-recognized standards.	
§170.315(g)(3) Safety Enhanced Design	Axxess Palliative follows the user-center design process for each of the criteria certified.	
§170.315(g)(4) Quality Management System	Axxess is an ISO-9001 certified organization.	
§170.315(g)(5) Accessibility Centered Design	Axxess Palliative meets ONCHIT standards for accessibility.	
§170.315(g)(6) Consolidated CDA creation performance	CDA Documents created in Axxess Palliative conform to the USCDI V1 requirements and the approved templates	
§170.315(g)(7) Application Access – Patient Selection	Axxess Palliative meets requirements of providing patient information via application programming interface (API).	
§170.315(g)(9) Application Access- All data request	Axxess Palliative meets requirements of providing patient information via application programming interface (API).	
§170.315(g)(10) Standardized API for patient and population services	Axxess Palliative meets requirements of providing patient information via application programming interface (API).	

Capability	Description of Capability	Costs or Fees *Types of costs or fees that a user may be required to pay to purchase, license, implement, maintain, upgrade, use, or otherwise enable and support the use of the implementation or use of the capability OR- in connection with the data generated in the course using the capability*
§170.315(h)(1)	Axxess Palliative users are able to send and receive health information using the Direct Secure Messaging protocols
