

CMS 139V12 Falls: Screening Future Fall Risk

Documentation Step-by-Step

Users must document using a billable visit for a patient with a CPT code that qualifies for the measure (this is most routine CPT codes).

The Falls Risk Assessment and Plan of Care are located in the functional assessment section of a clinical visit.

Once the fall risk assessment is completed, complete the note and associate the billable CPT code to the note.

If the patient meets the criteria that they are 65 or older and the user has completed the screening, then credit will be received for this measure.

Workflow: Any visit with a Coordination of Care section > Hospice Referral

This measure has an exception for any patient who has received hospice services during the measure period. If the user documents a hospice referral in the coordination of care section within any visit, this will capture the information necessary to exclude the patient from the measure criteria.

Provider Visit

- Visit and Demographics
- Diagnosis and History
- Chief Complaint
- Review of Systems
- Vital Signs
- Physical Assessment
- Supportive Assistance
- Medications
- Advance Care Planning and Goals
- Coordination of Care**
