Revolutionary Staffing Solution AxxessCARE Now Available in Massachusetts

Mobile Technology Transforming the Home Healthcare Industry

DALLAS, October 22, 2018 – AxxessCARE, the new mobile solution that solves scheduling and staffing challenges, is now available for home health agencies in Massachusetts. Created by Axxess, the fastest-growing home healthcare technology company, AxxessCARE has already helped agencies complete more than 2,000 patient visits in Texas and Illinois.

"AxxessCARE is a game-changer for the home healthcare industry," said John Olajide, Founder and CEO of Axxess. "We have built a platform that allows every size organization to overcome staffing challenges by utilizing their own staff or tapping into a larger network of available nurses."

AxxessCARE launched in 2017 and has expanded to serve more than 400 agencies across Texas and Illinois, with more signing up each day. Through AxxessCARE, agencies can conveniently post visits to schedule their own staff, and when needed, post visits for other nurses in the area to view and apply to provide timely care.

Nurses can download the AxxessCARE mobile app to any Android or iOS device, and once they clear background and license checks, they can apply for available visits within their own agency or visits posted from other agencies in a desired area at their preferred PRN-style pay rate. When a nurse applies for a visit, an agency can then see their competencies and user rating, and assign the most qualified nurse for the patient.

"Massachusetts is just the latest step for AxxessCARE," said Olajide. "Our goal is to roll out this solution nationwide, while abiding by each state's unique staffing regulations. That's why AxxessCARE is a fully-compliant and easy-to-use solution."

AxxessCARE is available to Axxess clients who use Axxess AgencyCore software.
