Axxess Named Among the Computerworld 2019 Best Places to Work in IT

Healthcare Technology Leader Honored For Fifth Straight Year

DALLAS, June 20, 2019 – Home healthcare technology innovator Axxess has once again been honored as one of IDG’s Computerworld 2019 Best Places to Work in IT. This is the fifth consecutive year Axxess has been ranked among the 100 finalists. Axxess also ranked number one in the diversity category.

Based on comprehensive questionnaires and in-depth employee surveys, Axxess was among the leaders in the category for organizations with fewer than 1,000 employees. Organizations were ranked based on their ability to develop outstanding IT staff while providing great benefits and compensation.

“It is an honor to be recognized for our constant commitment to a culture that cultivates excellence through diversity and inclusion,” said Axxess founder and Chief Executive Officer John Olajide. “The unique culture at Axxess that has been created by our phenomenal team is why we are able to deliver such an exceptional experience for our clients.”

The Axxess culture – which was also recently honored by *Modern Healthcare* as a “Best Place to Work in Healthcare” – emphasizes excellence, innovation, transparency, diversity and inclusion in all company activities. This has led to multiple innovations that are firsts for the home healthcare sector, including new features to prepare providers for the implementation of the [Patient-Driven Groupings Model](#), the first device-agnostic mobile app for clinicians, the first-ever [OASIS app feature](#) enabling patient assessments and documentation by clinicians anywhere while also ensuring HIPAA-compliance, and the pilot of [AxxessCARE](#), a completely new tool that connects home health agencies to qualified clinicians to provide timely care.

The culture of innovation at Axxess is why the company’s revolutionary software solutions have helped streamline the operations of more than 7,000 organizations. Axxess serves more Medicare-certified organizations with technology that enables business growth while also decreasing costs. Using mobile-friendly, cloud-based software, the staff of any healthcare-at-home organization can spend more time caring for patients to improve outcomes.

“The market for IT talent remains very tight, and employers continue to focus on finding and holding on to the best people,” said *Computerworld* executive editor Ken Mingis. “Our 2019 survey shows again that the Best Places to Work in IT are dynamic organizations that provide top pay and a broad array of programs and benefits designed to make them attractive places to

work. Many show that they have a commitment to training, to diversity and to improved communication and teamwork.”

###
