**Over 20,000 Home Healthcare Visits Completed  
Using On-Demand Scheduling and Staffing Solution Axxess CARE**

*Organizations Connect with Qualified Clinicians to Provide Timely Care*

DALLAS, June 10, 2020 – Leading technology innovator for healthcare at home [Axxess](#) has quickly reached a significant milestone in its commitment to address staffing challenges and empower agencies to provide timely care.

More than 20,000 visits have been completed by clinicians accepting visits from organizations using [Axxess CARE](#), the scheduling and staffing solution. The innovative solution has seen exponential growth since its release in 2017. The 20,000 completed visits milestone was achieved in only six months, following the 10,000-visit mark that occurred after two years. The platform is expected to see similar growth as it continues to gain attention.

“This is an exciting milestone because it reinforces that Axxess CARE is providing a valuable solution for staffing challenges throughout the industry,” said John Olajide, Founder and CEO of Axxess. “Through Axxess CARE, home health organizations can schedule their own staff, and when needed, extend their staffing capacity and grow their business through access to qualified clinicians to meet patient needs. At the same time, clinicians enjoy a more convenient way to work.”

Axxess has been systematically introducing Axxess CARE to new markets to fine-tune the platform and processes before introducing it to the entire industry. Axxess CARE initially launched in one state, but now home health organizations in 16 states can connect with nurses and physical therapists.

Axxess CARE is seamlessly integrated with Axxess Home Health, a secure, HIPAA-compliant software platform, allowing organizations to conveniently post visits for qualified professionals. After downloading the Axxess CARE mobile app through the Apple App Store or Google Play, clinicians can apply for visits after background checks and license verifications have been completed. Organizations have the flexibility to review and select the most appropriate clinician for each posted visit.

Through the sophisticated Axxess CARE platform, clinician profiles, competencies, expertise, availability and ratings can be viewed by organizations at any time, and organizations are able to communicate with interested clinicians, post visits and coordinate care in real time. Axxess CARE's advanced electronic visit verification feature helps organizations know when visits are complete so they can review documentation, easily process payments and rate performance.

“We have heard from many providers who love the convenience of knowing they can access additional qualified whenever it is needed.” Olajide said. “We have also received encouraging words from clinicians who are part of the AxxessCARE network because they can apply for visits that are convenient to their location and schedule, and at rates that work for them,” Olajide added.

The Axxess CARE app enables clinicians to complete all visit documentation right in the patient's home allowing them to complete work faster. They can also easily track past, current and projected earnings.

Axxess CARE is available to Axxess clients who use Axxess Home Health software.
