## **Axxess Selected as a Best Place to Work by Insider Pro and Computerworld**

*Healthcare Technology Leader Honored for Seventh Straight Year*

DALLAS, July 12, 2021 – [Axxess](#), the leading technology innovator for healthcare at home, has been named as one of the [Insider Pro and Computerworld](#)'s 2021 Best Places to Work in IT, making this the seventh consecutive year Axxess has received this award.

The Best Places to Work in IT program began in 1994, and 100 organizations have been recognized each year since then. Recipients are determined by the results of a comprehensive questionnaire regarding company offerings. The questionnaire covers categories such as benefits, career development, training and retention. Organizations are then ranked based on their ability to develop outstanding IT staff while providing great benefits and compensation.

“At Axxess, we have a culture of openness and collaboration, and everyone is empowered to bring their authentic self to work every day,” said Axxess founder and Chief Executive Officer John Olajide. “The Axxess Way is our commitment to treat every Axxessian as an individual, respect their dignity, recognize their merit and provide a sense of security and fair compensation. I am proud that Axxess has once again earned this award.”

The Axxess Way, combined with the company's culture of innovation, is why Axxess' easy-to-use software solutions have helped streamline the operations of more than 8,000 organizations. Axxess' emphasis on excellence, transparency, diversity, equity and inclusion has led to multiple innovations, such as a new [Certification Program](#) to help clients address care at home staffing and workforce development challenges, as well as a [partnership](#) with Care at Heart, which provided the industry with one of the first palliative care software platforms.

“Despite the overwhelming obstacles the pandemic has created for many businesses, IT has managed to thrive and in fact, become more essential in the workplace. Attracting and retaining top IT talent to research, deploy and maintain technology has never been more critical,” said Kate Hoy, editor of IDG's Insider Pro. “Companies that have earned a spot on the Insider Pro and Computerworld 2021 Best Places to Work in IT list have been able to foster nimble and flexible work environments – while continuing to keep competitive compensation and benefits steady. Additionally, they foster a spirit of diversity, social responsibility, training and innovation.”

###
