JonSan Home Health Signs Joint Agreement with Forcura and Axxess

*Tech Integration Will Enhance Care Coordination
Across JonSan's Home Health and Personal Care Service Lines*

Jacksonville, Fla., February 27, 2023 – Forcura, a healthcare workflow management company, and Axxess, the leading technology innovator for healthcare at home, today announced they have signed a joint agreement with Texas-based home health care agency JonSan. Through the agreement, JonSan will leverage the full suite of technology from both companies to enhance care coordination across its home health and personal care service lines.

“As post-acute and ongoing care continues to increasingly take place in the home, the need to maximize interoperability across a variety of care settings is paramount,” said [Sandra Crady, owner and administrator of JonSan](#). “Forcura and Axxess have both created platforms that enable smoother care transitions and a stronger patient experience. In addition to their technology, their creative and collaborative relationship will help advance and elevate us in the marketplace.”

Both Forcura and Axxess’ technology platforms are designed to improve a provider’s operational efficiencies and patient experience, ultimately helping transform the delivery of care in the home. For example, clients of both companies can process referrals and onboard patients up to 50% faster through workflow and collaboration tools that enable providers to electronically sign plans of care and update patient charts in real time.

“Since joining forces with Axxess, we have jointly delivered meaningful and quantifiable results to providers, helping them better serve patients and share their value stories,” said

[Annie Erstling, chief operating officer of Forcura](#). “JonSan is the next chapter of that partnership. We’re honored to have earned their trust as we set out to again demonstrate the impact we make on both the home health and personal care sectors.”

Forcura and Axxess first formed their partnership in 2021. Since then, they have helped provider organizations across post-acute care better use technology, resulting in safer and smoother patient care coordination and transitions, especially from acute-care settings.

“We’re driven to help providers do more with less in an ever-evolving post-acute landscape,” said [Tim Ingram, executive vice president of interoperability at Axxess](#). “Through our integration with Forcura, we’ll help JonSan provide strong patient care and optimize revenue cycles, while lowering expenses. We’re excited to get started.”
